

Very Fast Delivery products of OMI

Aura Science Team Meeting

September 2006, Boulder

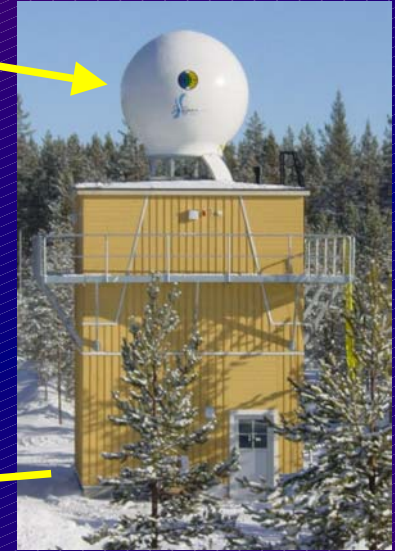

Seppo Hassinen, Johanna Tamminen, Aapo Tanskanen,
Anssi Mälkki, Gilbert Leppelmeier, Osmo Aulamo

Finnish Meteorological Institute

Basics, Processing facility:

beeb beeb

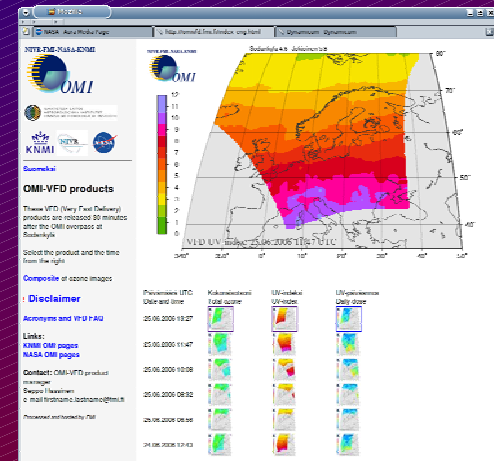

2.4 m dish antenna,
receivers and
control computer

~700 km

ARC (Arctic Research Center)
Processing facility: Linux clusters
for processing, controlling
and archiving

FMI's www server

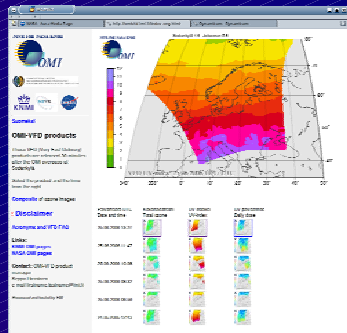

Basics, Processing chain:

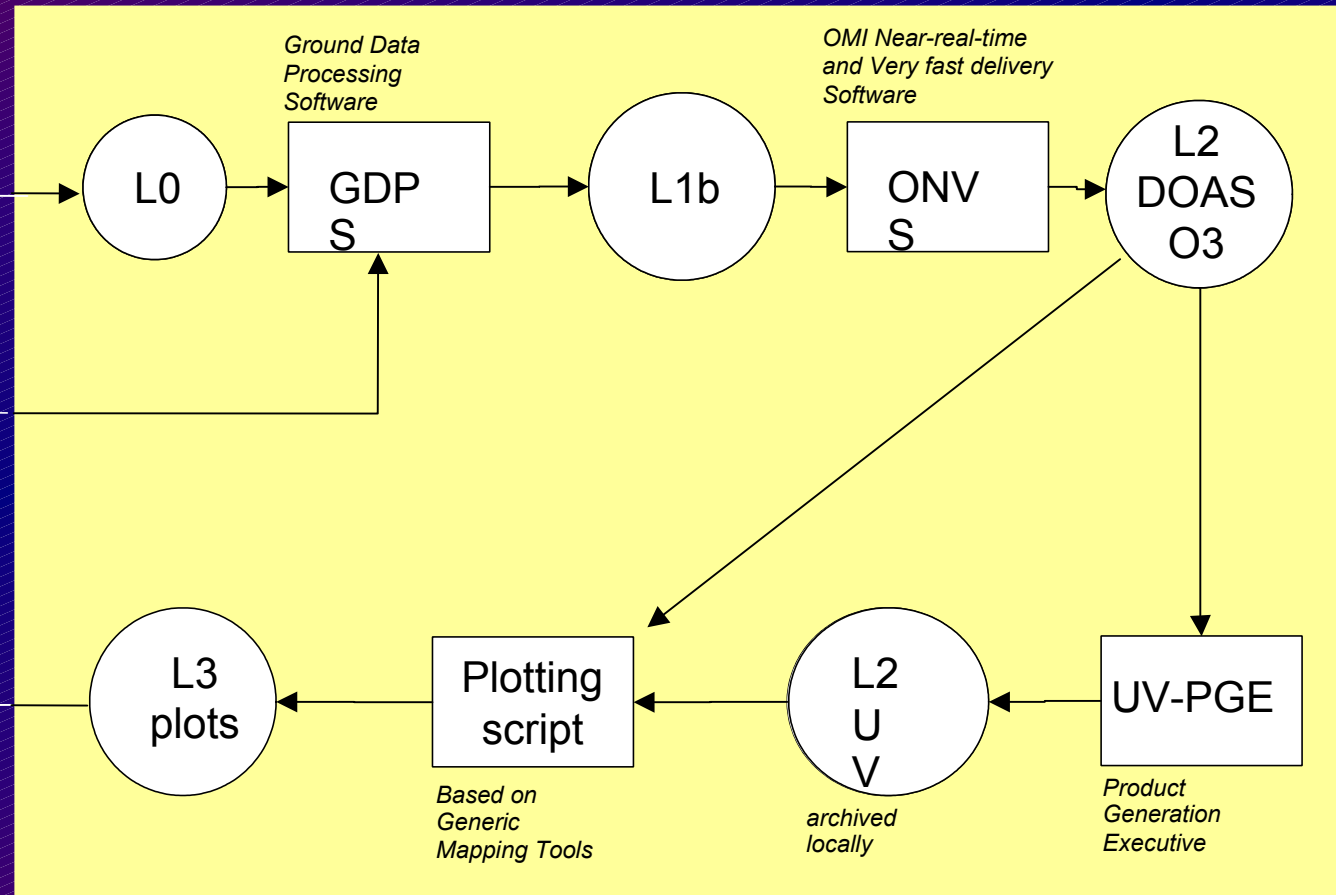

Direct Broadcast

Aux. data

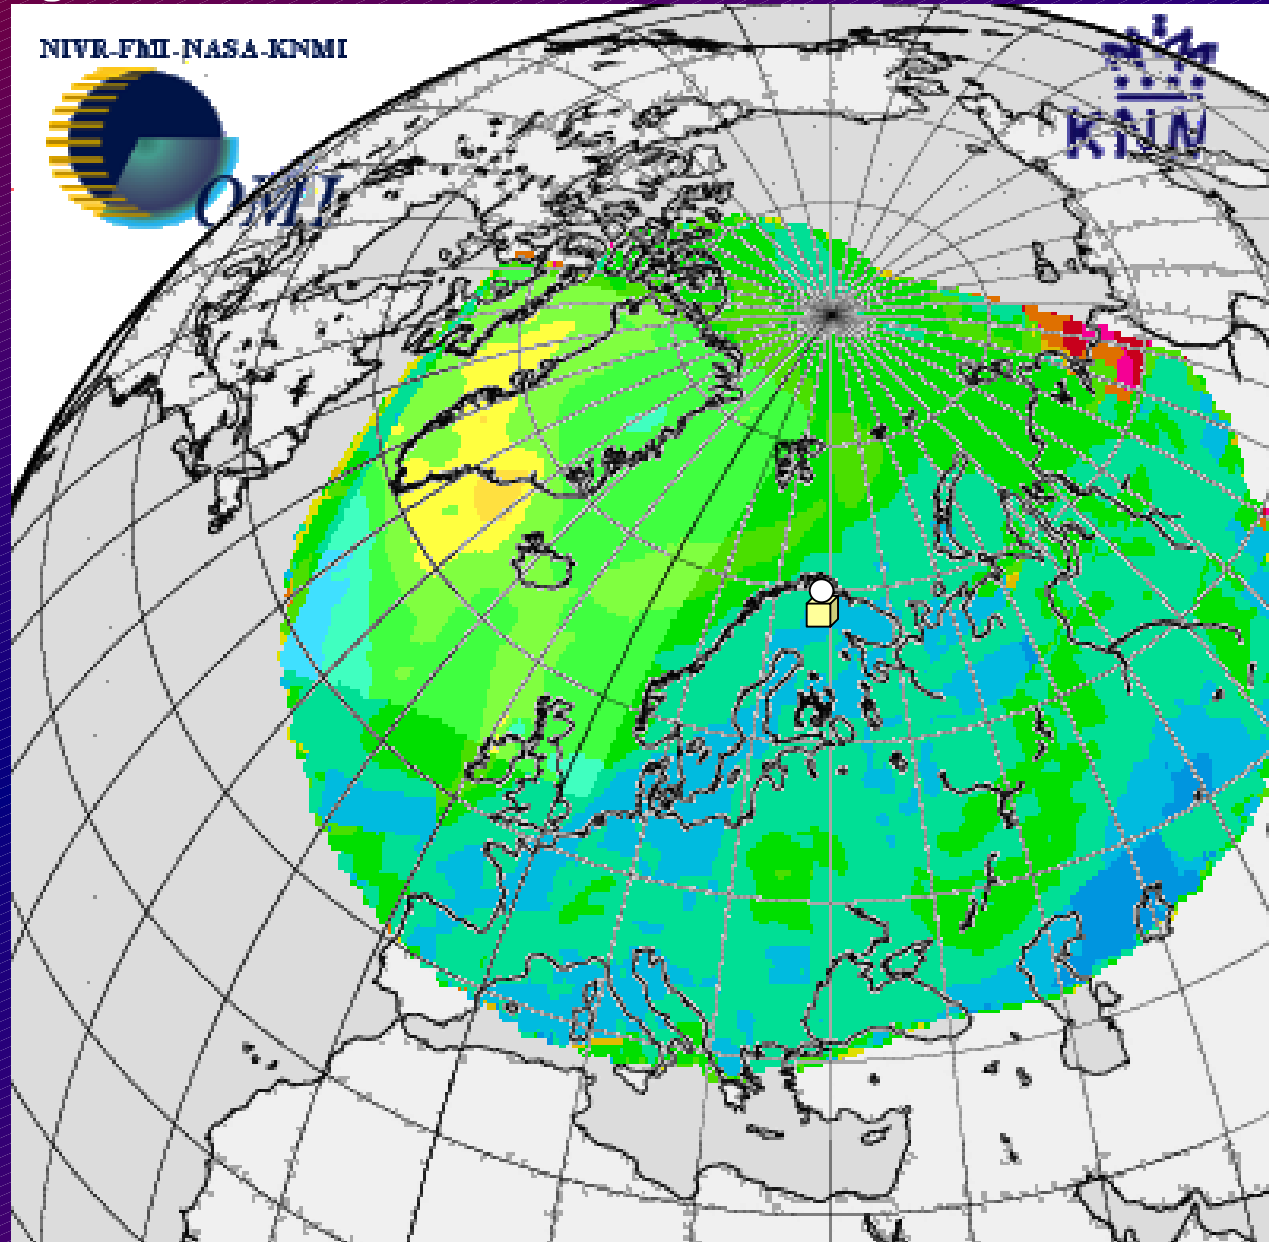

Components of this chain comes from KNMI, FMI and NASA

15 min

What we can see with the Direct Broadcast?

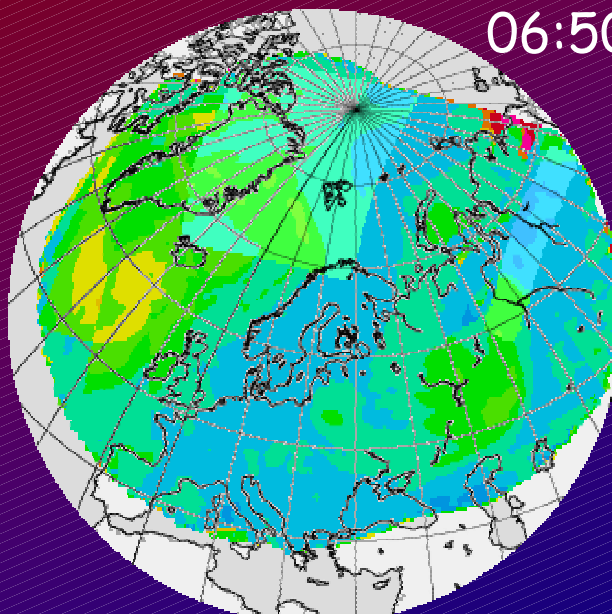

Areal coverage, 01.02.2006–19.06.2006:

Sodankylä
receiving
station

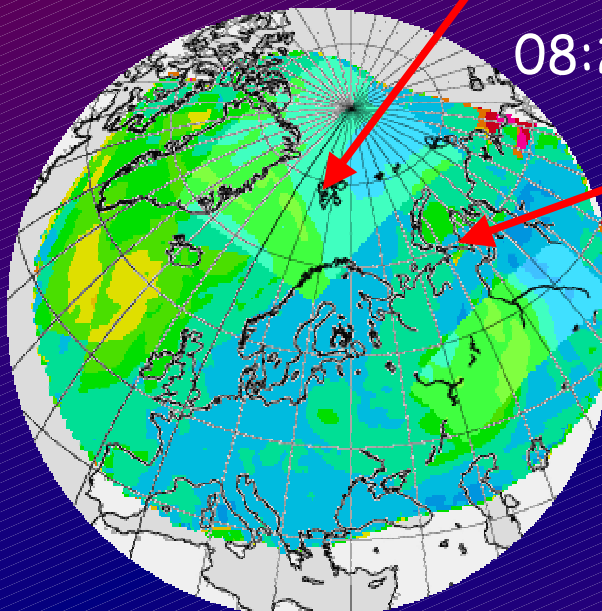

Areal coverage, overpasses 04.07.2006:

06:50 UTC

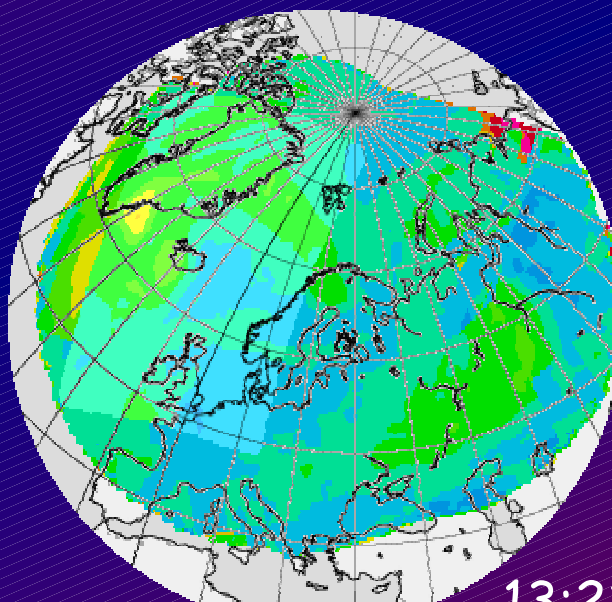

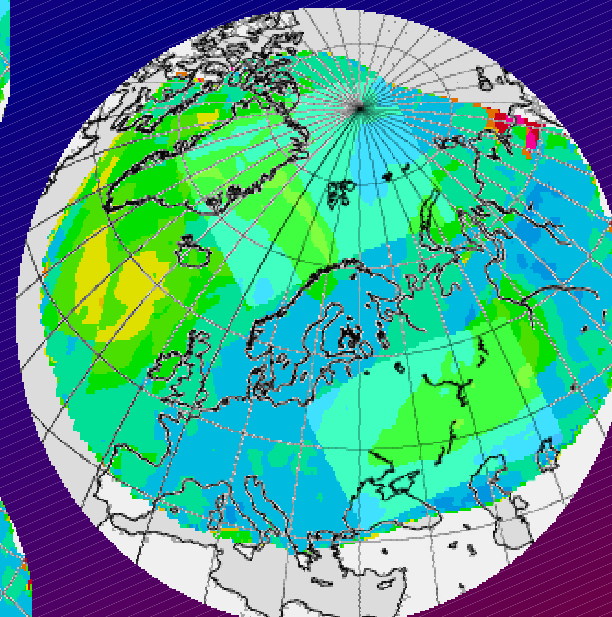

Ground station

08:26 UTC

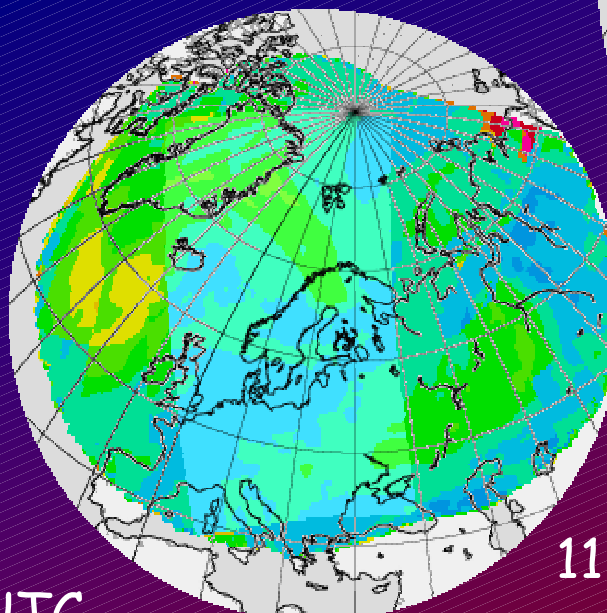

Data sent to Ground station from the satellite memory

10:02 UTC

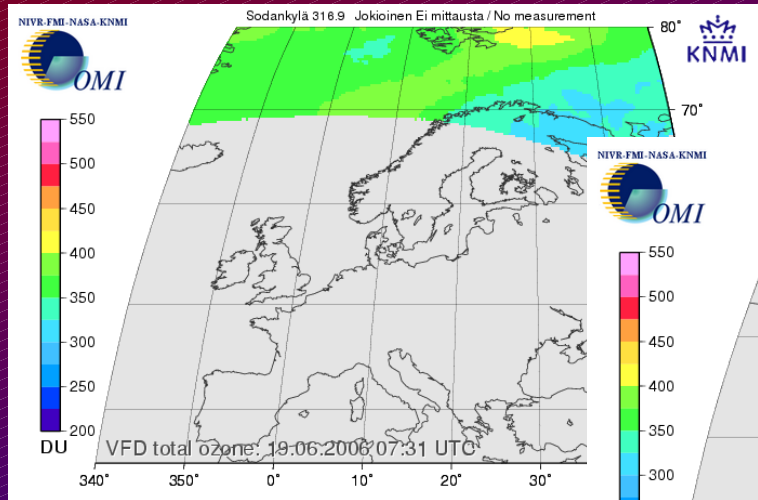

13:21 UTC

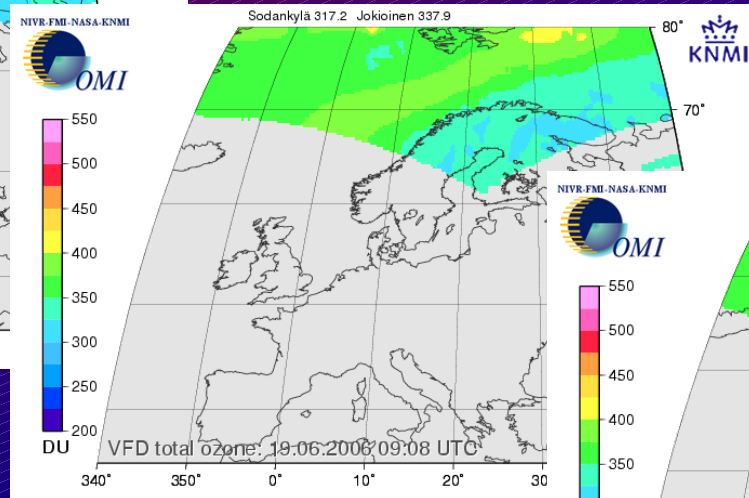

11:41 UTC

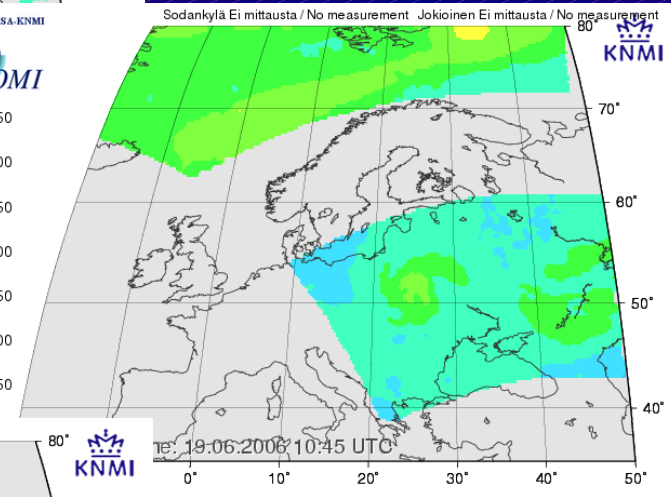

Consistency and temporal coverage, 19.06.2006:

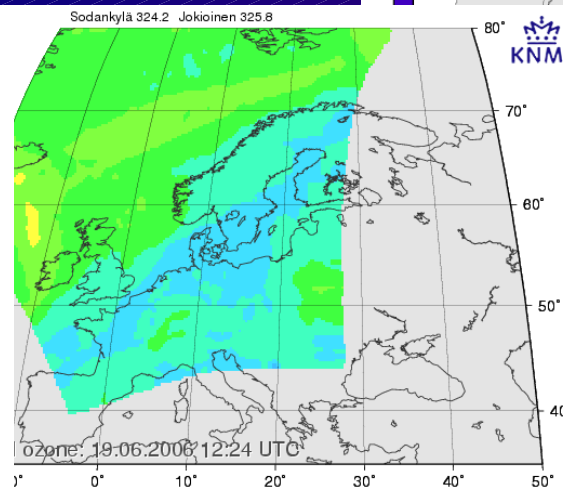

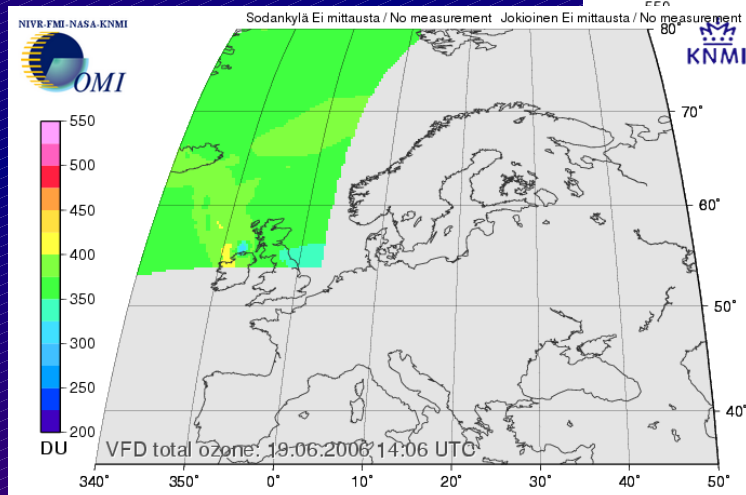

07:31 UTC

09:08 UTC

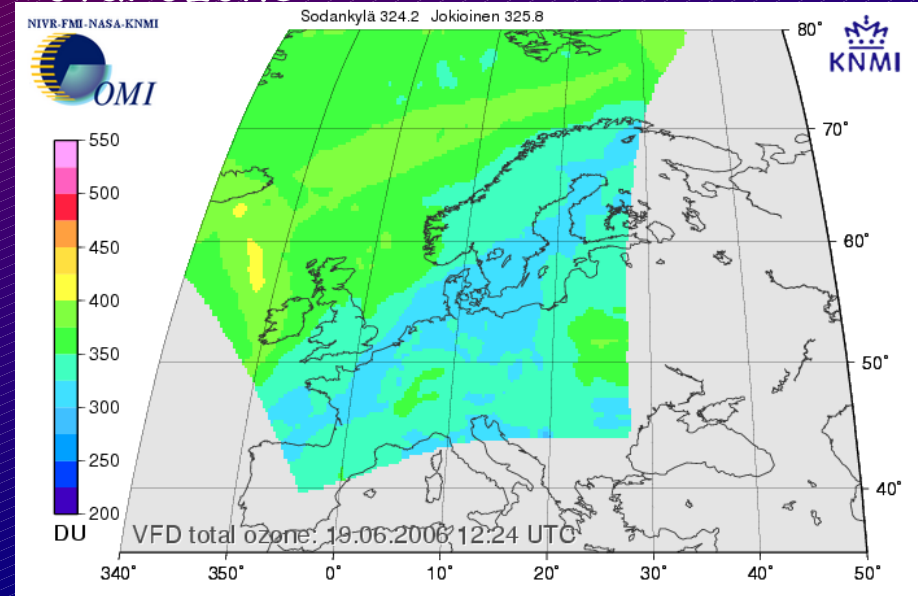

10:45 UTC

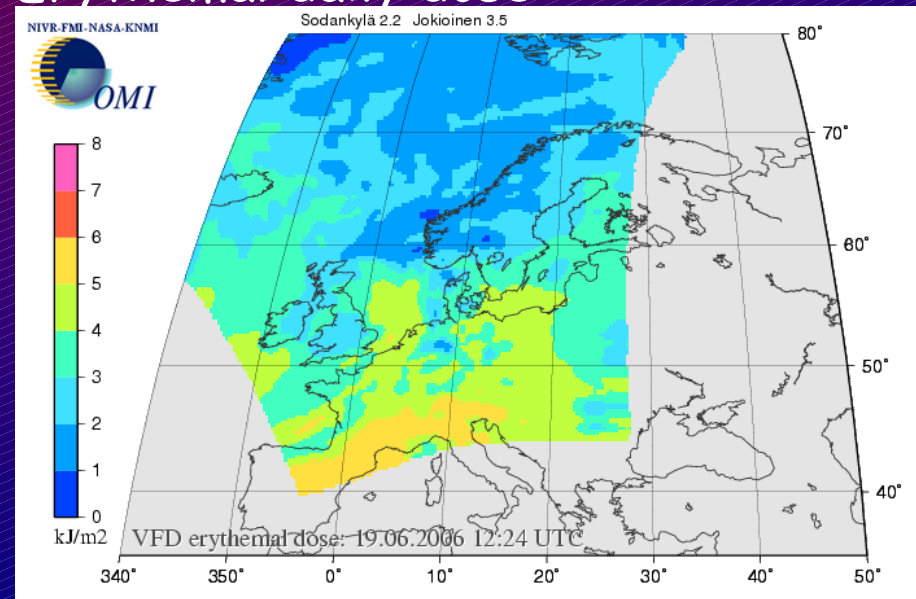

12:24 UTC

Products, 19.06.2006:

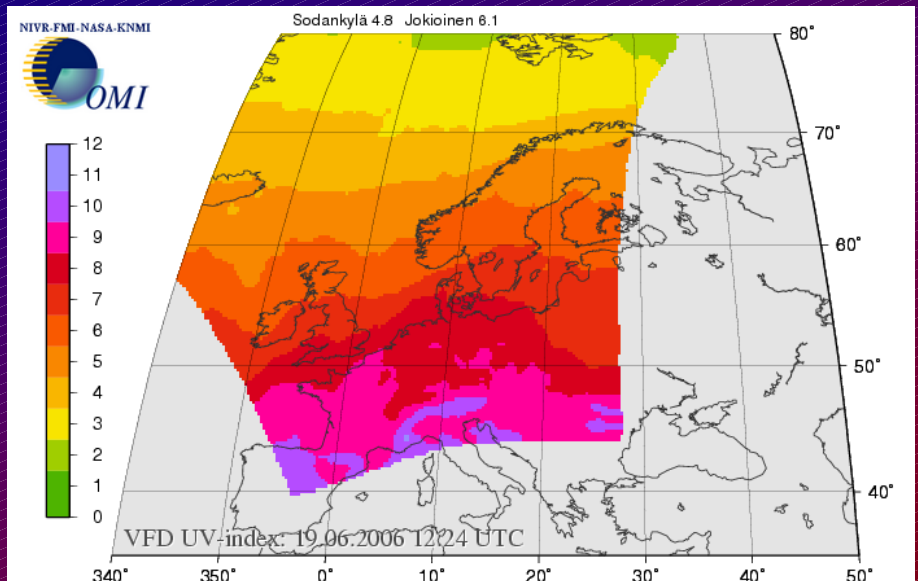

Total ozone

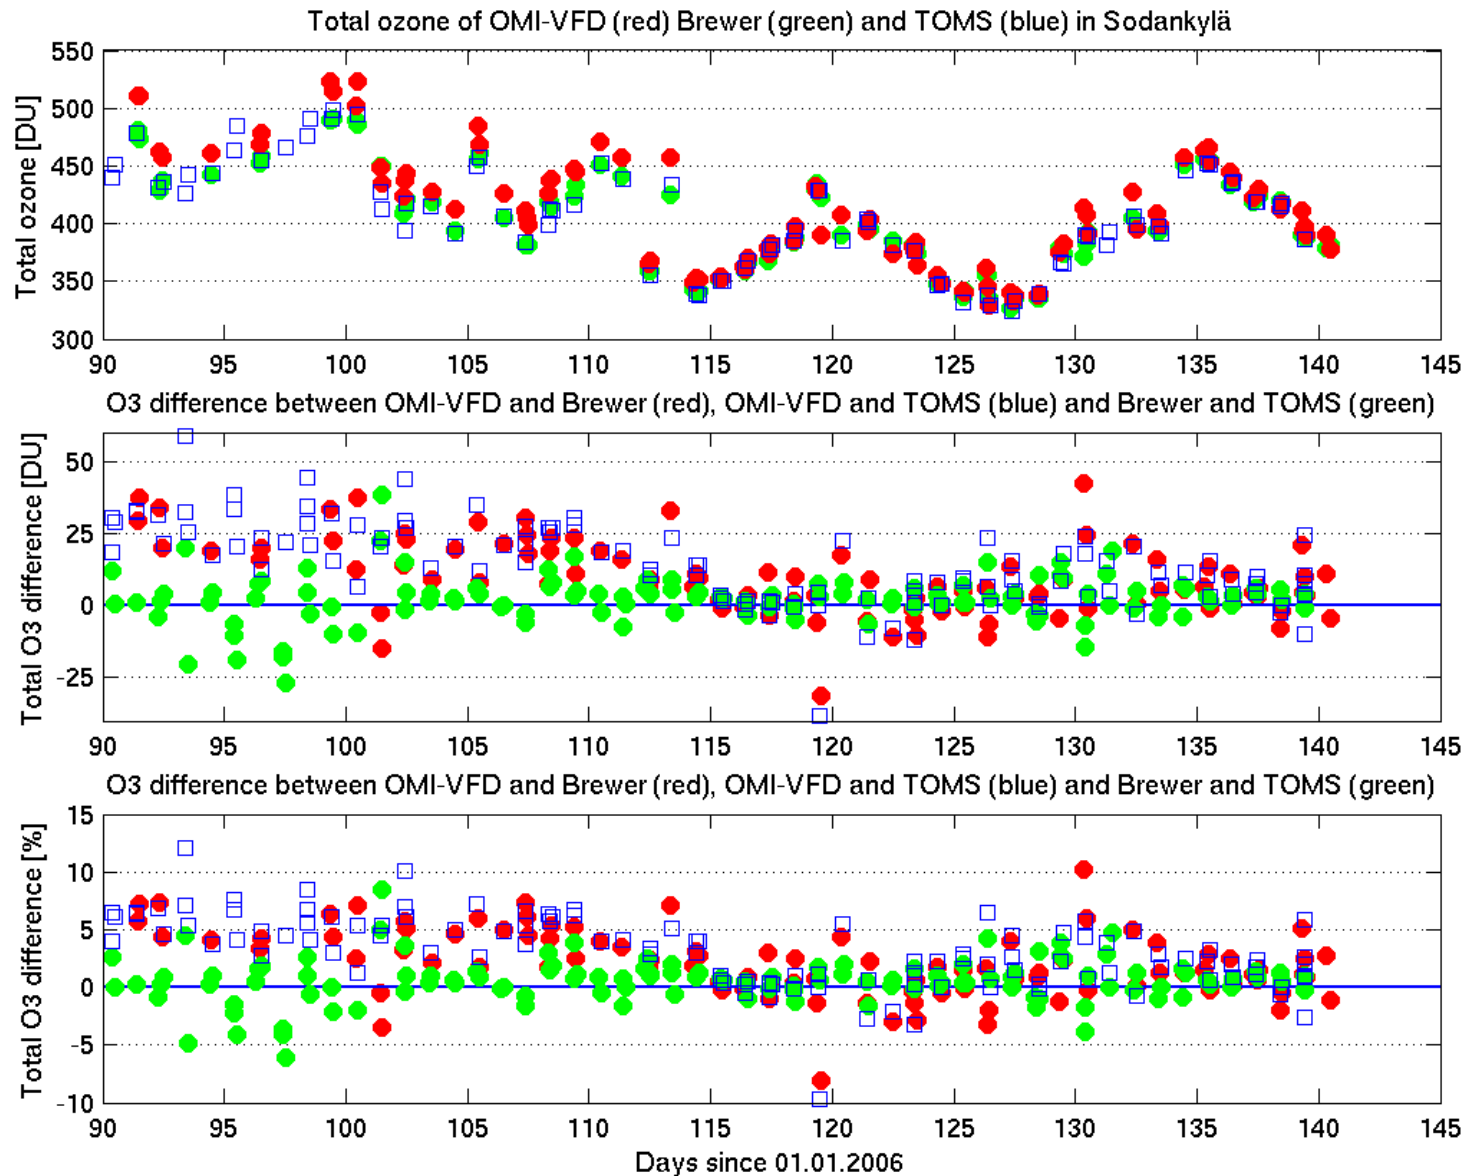

Erythemat daily dose

UV index

Validation: to be done

Sodankylä Ei mittausta / No measurement Jokioinen 4.7

VFD UV-index: 23.05.2006 12:43 UTC

| Päivämäärä UTC Date and time | Kokonaisotsoni Total ozone | UV-indeksi UV-index | UV-päiväannos Daily dose |
|---------------------------------|---|---|---|
| 23.05.2006 12:43 |  |  |  |
| 23.05.2006 11:03 |  |  |  |
| 23.05.2006 09:26 |  |  |  |
| 23.05.2006 07:50 |  |  |  |
| 22.05.2006 13:40 |  |  |  |
| 22.05.2006 11:59 |  |  |  |

Discussion

When to use DB?

- Interest in local conditions <- No global coverage
- Qualitative usage <- No scientific accuracy
- Fast availability, regular time coverage
- Fast decisions required
- Interests of general public

Discussion

Limitations of the Direct Broadcast?

- Configuration files and LU tables are not always up to date
- Dumping of the memory to the ground station
- Limited visibility of the satellite
- Smooth data flow required (every day, operational usage)
- Short processing time required <- fast computers?

Discussion

Possible other targets of the DB?

- Man made environmental hazards
- Dust from deserts
- Pollution over heavily populated areas
- Volcanic emissions and plumes
- Forest fires
- Weather
- ????
